A common path towards health data sharing

The European Health Data Space (EHDS) will facilitate sharing health data to develop research and improve citizens' health. In order to unleash the full potential of health data EU health data policy is fundamental, supporting infrastructures that enable responsible health data sharing. Legal and regulatory frameworks are fundamental to enable responsible exchange of data within a health data ecosystem.

Part 1

Implementation of the European Health Data Space

Dr. Lydia Unger-Hunt *Moderation*

16:00 Welcome and introduction

Opening remarks by Steering Committee

Prof. Dr. Bettina Borisch *Institute of Global Health, Switzerland*

Prof. Dr. Thomas Berlage *Fraunhofer Institute for Applied Information Technology, Germany*

A common European Health Data Space - A path towards digital healthcare in the EU

Licínio Kustra Mano *European Commission, DG SANTE, Belgium*

The role of the EHDS for digital healthcare in Germany

Nick Schneider *Ministry of Health, Germany*

Toward a shared European data health infrastructure

Mario Jendrossek *Health Data Hub, France*

Health data architectures for routine care and research

Sebastian C. Semler *TMF - Technology, Methods, and Infrastructure for Networked Medical Research, Germany*

Collaborative ways in evidence generation

Dr. Julia Wagle *Roche Pharma AG, Germany*

Panel discussion

Licínio Kustra Mano *European Commission, DG SANTE, Belgium*

Nick Schneider *Ministry of Health, Germany*

Mario Jendrossek *Health Data Hub, France*

Sebastian C. Semler *TMF - Technology, Methods, and Infrastructure for Networked Medical Research, Germany*

Prof. Dr. Bettina Borisch *Institute of Global Health, Switzerland*

Birgit Bauer *Data Saves Lives EU, Germany*

Dr. Julia Wagle *Roche Pharma AG, Germany*

Wrap Up

Prof. Dr. Bettina Borisch *Institute of Global Health, Switzerland*

17:40 Break

Part 2

Towards health data ecosystems in Europe: Supporting responsible health data sharing

17:45 Data spaces and data ecosystems for sustainable health systems

Infrastructures for trustworthy and secure sharing of health data in Europe

Securely Sharing Clinical Research with Researchers

Julie Wood *Vivli Center for Global Clinical Research Data, United States*

The Health Outcomes Observatory: A patient-centric healthcare approach

Prof. Dr. Matthias Rose *Charité – Universitätsmedizin Berlin, Germany*

OSCAR: Danish One Stop Shop For Clinical Research

Troels Mortensen, MSc. E-MBA *DataFair, Denmark*

German Human Genome-Phenome Archive

Prof. Dr. Oliver Stegle *German Cancer Research Center (DKFZ), European Molecular Biology Laboratory (EMBL), Germany*

Medical data spaces

Prof. Dr. Thomas Berlage *Fraunhofer-Institute for Applied Information Technology, Germany*

Wrap-up and closing remarks

Prof. Dr. Bettina Borisch *Institute of Global Health, Switzerland*

Prof. Dr. Thomas Berlage *Fraunhofer-Institute for Applied Information Technology, Germany*

19:00 End of event
